Thank you very much for your time and interest in Vista's districting process. As the City's demographic consultant, NDC has received your proposed plans and imported them into our computers. Attached are the resulting PDF maps and demographic spreadsheets.

A couple of notes about the maps. To better distinguish the proposals, I've taken the liberty of calling your "4a" and "4b" maps "4" and "5," respectively. In addition, I have to note that Map 1 is not contiguous-- placing Population Unit 39 in District D divides the west and east parts of District C. While on the map itself, Pop Unit 39 is placed in C, the population figures and block assignments put it in District D. Please let me know if you want to modify this. Otherwise, the maps are contiguous and population-balanced, and are legally viable draft maps.

Assuming you're fine with these changes, I will post the maps and accompanying demographics to the City's districting website. The comments regarding your plan that you submitted along with the map will also be provided to the City Council.

Once again, thank you for your interest in this process and for taking the time to draw and submit a proposed map of City Council districts. Please encourage your friends and neighbors to share their views regarding this important project for Vista – the more public participation we can generate in this process, the better!

Justin

Justin,

Thank you for your email message and notes regarding my maps. I appreciate the feedback and the pointing out of the error contained in Map 1. It was my intention to include Population Block 39 as part of District C, and this would make District C contiguous. If you could make that alteration before placing that map on the City of Vista's web site, I would be most appreciative. Once that alteration is made to Map 1, please forward me a revised copy of the map along with the population demographics as well.

I will attempt to encourage others to participate in this process. I agree with you that the more public participation the better for the City of Vista.

Once again, I appreciate your email and feedback regarding my map submissions. If you have any other questions or need any further assistance from me, please feel free to contact me.

Sincerely,

Dr. W. R. "Rob" Christensen

That's what I expected but it's always better to be sure. Thank you for replying; I will update the plan this afternoon before I upload.

Dr. Christiansen, in order to keep the total population deviation below 10%, if I move Population Unit 39 into District C, I need to move Population Unit 42 into District D (as attached). The only other adjacent unit is 46, but that is too large. Does this look okay to you?

Thanks,

Justin

Justin,

Thanks for the modification to ensure it comports with applicable state and federal law regarding the drawing of political districts. It looks fine. I appreciate your assistance. Have a great evening!

Dr. W. R. "Rob" Christensen
